

ABSTRACT

In a golf ball comprising a core and a cover of at  
5 least one layer enclosing the core, at least one layer of the  
cover is formed of a resin composition comprising as  
essential components, (a) a component selected from the group  
consisting of an olefin-unsaturated carboxylic acid copolymer,  
an olefin-unsaturated carboxylic acid-unsaturated carboxylic  
10 acid ester copolymer, and metal ion-neutralized products of  
these copolymers, and (b) a binary copolymer consisting of a  
polyolefin component and a polyamide component.
